

BILL HERRON

Gaming Developer

CAREER GOALS

Leverage my knowledge and experience in the gaming payments industry in a role that includes the opportunity to modernize and update the payment products a company offers to its customers. Analyze and work with payments data to discover hidden patterns and relationships that can result in better decisions.

PROFILE

Accomplished technical architect offering over 20 years of experience in comprehensive design, development and implementation of infrastructure and architecture for data communications software projects, with the last 15 years specifically focused on the gaming payments industry. Broad experience in both legacy systems and cutting-edge cloud implementations.

WORK EXPERIENCE

Zanden Communications: Principal/Systems Architect

1991–Present

Founded Zanden Communications in 1991, providing communications integration services to medium and large-sized companies that utilize IBM host systems (System I, iSeries, AS/400). In 2002 pivoted the business to focus on communications integration for gaming payment systems, including brick and mortar and iGaming applications. Increased emphasis was placed on mobile and cloud-based implementations, while continuing support for IBM legacy platforms.
